Coimbatore, Tamil Nadu, India

ACADEMICS CREDENTIALS

M.Sc. in Software Systems

PSG College of Arts & Science

Coimbatore, India

Percentage : 82% | 2022 – Present

HSC

Hindusthan Matriculation and Higher Secondary School

Coimbatore, India

Percentage : 84% | 2021-2022

SSLC

Hindusthan Matriculation and Higher Secondary School

Coimbatore, India

Percentage : 75% | 2019-2020

INTERNSHIP

I. Fulcrum Technologies Inc., India

2025

Role: Intern | Tester | 3 Months

Responsibilities: Executed end-to-end test automation using Selenium WebDriver and Cucumber (BDD) in Eclipse IDE, improving test efficiency by **30%** and reducing manual testing effort. Designed and maintained reusable test scripts for web applications, ensuring consistent validation of key functionality.

Achievements: Transformed manual test cases into structured automation scripts, reducing testing time by **40%** and increasing test coverage.

II. Pinsphere Solutions Pvt. Ltd., India

2025

Role: Intern | Full Stack Developer | 3 Months

Responsibilities: Developed full-stack web applications using Django and PostgreSQL, improving backend performance by **25%** through optimized database integration and scalable architecture. Built and optimized RESTful API endpoints for efficient data handling.

Achievements: Spearheaded the development of scalable web applications, ensuring reliable backend performance and deployment-ready solutions.

SKILLS

Technical Skills

Languages: Java | Python | MySQL | HTML

Tools: Django | Burp Suite | Selenium WebDriver | Cucumber (BDD) | Apache JMeter | Eclipse IDE | Postman | OWASP ZAP

Soft Skills: Problem - Solving | Leadership | Time Management | Adaptability | Responsibility | Negotiation

Computer Skills: MS Office | **OS :** Windows, Kali – Linux

PROJECTS

I. Vulnerability Assessment and Penetration Testing on API

2024

Tech Stack: Burp Suite | Postman | OWASP ZAP

Objective: To evaluate the security of APIs by identifying vulnerabilities and testing potential attack vectors, and to ensure secure communication and proper data handling practices are in place.

Outcome: Conducted API security testing using Burp Suite, Postman, and OWASP ZAP, identifying critical vulnerabilities and improving system security with actionable fixes.

II. Automation Testing of Web Application

2025

Tech Stack: Selenium, Cucumber, Java, Eclipse IDE

Objective: To validate web application functionality through automated end-to-end testing and ensure reliability of critical workflows such as login and data entry.

Outcome: Built an end-to-end automation framework using Selenium WebDriver and Cucumber, improving test reliability and reducing manual testing effort by 30%. Automated key workflows, increasing test coverage and execution efficiency.

III. Appointment Management System

2025

Tech Stack: Django, Python, PostgreSQL

Objective: To develop a web-based system for efficient appointment booking and scheduling, and to implement secure access control for different user roles.

Outcome: Developed a Django-based appointment system with role-based access control, improving scheduling efficiency and optimizing database performance.

Courses and Certifications

API Penetration Testing – APIsec University

2023

Java for Android - Vanderbilt University (Coursera).

2024

Python for Data Science, AI & Development - IBM (Coursera).

2025

Introduction to Internet of Things - IIT Bombay (Coursera).

2025

Database Management System - NPTEL.

2025

Co-Curricular Activities

Secured **1st Place** in *Hackverse Hackathon*, organized by the Institution Innovation Council, demonstrating strong problem-solving and innovation skills. **2024**

Achieved **1st Place** in a *Technical Quiz* at Karpagam College of Engineering, highlighting strong technical knowledge and analytical ability. **2025**

Secured **2nd Place** in *Paper Jam (Paper Presentation)*, an inter-department event, demonstrating effective communication and presentation skills. **2025**
